

# AMERICARE SERVES SCHOOLS

Immediate Care with a Personal Touch.

Children, America's most important asset, are also the nation's most vulnerable. The majority of their formative years are spent not in the care of their parents but with public and private school professionals. Now, parents can be confident their children's safety and health are assured even at school.

## Call MD™ Protects School Children

Professionals use the **File MD** electronic health records service to safely store medical history of children in public or private schools. If a child transfers to a new school district or simply graduates from one school to another, all their health information moves with them. **File MD** ensures parents, teachers and administrators:

- **Safe storage of school children's electronic health records (EHR), in one location, including immunizations, allergies, and conditions**
- **Hassle-free retrieval of health data about the children for school nurses**
- **Instant access for approved physicians to a child's password-protected medical files should a medical emergency occur**

## Call RN™ Provides Easy Document Transfers for School Kids

**Call RN** Centers are staffed with experienced, registered nurses licensed to practice in the United States. School professionals can access the health information files for each child as needed. **Call RN** makes it effortless for school nurses to:

- **Talk to a registered nurse on the 24/7/365 hotline**
- **Access school children's secured electronic health records (EHR)**
- **Coordinate medical/non-medical electronic data storage, retrieval, and transfers when a child moves from one school to another**

**File MD** is a turnkey, digital record-keeping service supported by the finest technology, talent, processes, and procedures to effectively support schools' efforts to manage student medical and health records.

**The Benefits of the Service:**

- Students receive faster, more accurate treatment in the event of an emergency.
- Athletic trainers and school nurses have more time to focus on student health care rather than spending time locating student health information.
- Medical data and forms no longer need to be transported from one location to another – **File MD** delivers them digitally in minutes so student records are accessible anytime, from anywhere.
- Schools liability exposure is diminished and administrative costs are reduced.
- School nurses' and athletic trainers' skills are optimized.
- Students (and their parents) are assured of greater privacy and confidentiality in regards to their medical and health information because there is no risk of losing or copying the records.
- Substitute coaches and supervisors can easily access forms.
- Students and school authorities have the peace of mind that their records cannot be destroyed by vandalism or fire. Unlike paper based systems, **File MD's** digital service has 100% back up to safeguard records under any circumstances.
- The service is easy and inexpensive to join.

**What Our Customers Say About the File MD Service**

*"File MD (formerly Medfile) fills the void for school administrators seeking to provide 24 hour access to medical and emergency information. Immediate access to up-to-date compliance reports simplify the extensive data processing issues every athletic director faces with regard to documenting physicals and emergency data. File MD executives and staff are diligent, courteous and always available with a timely response to any inquiry."*

Donna Brickley, CAA  
Director-Physical Education/Athletics  
NotreDame Academy, Grades 9-12  
Hingham, MA

*"File MD's system of record keeping has proven to be very reliable. All records have been handled in a confidential manner; any changes have been done with speed and efficiency. We no longer have to worry about forms being shuffled between coaches and games, or with faculty on field trips. We have the confidence that comes from carrying our File MD card wherever we go!"*
